PROFILE

At a young age, when I first had the Internet explained to me, I immediately began sketching out a site that would show off my massive collection of "Star Wars" toys, books, and other tid-bits. It was my desire to create the greatest "Star Wars Collectibles" website known to man.

Looking back on it now, it may seem a bit silly, but the fire and passion for web development I had at the very start still burns brightly today.

I strive to write semantic, web standards code in all my work, and stay up-to-date following web trends. Be it HTML5 to CSS3, or more along the lines of coding strategies such as Progressive Enhancement, I work to stay informed so my work is always top notch.

EXPERIENCE

WEB DEVELOPER - VPLS INC - ORANGE, CA 2009 - PRESENT

Designed with a team of highly knowledge and skilled developers, working on multiple internal and external projects for the company.

- ▶ VPLS Inc - <http://vpls.net>
- ▶ Krypt Hosting - <http://krypt.com>
- ▶ My.Krypt.com - <http://my.krypt.com>
- ▶ Krypt Mobile
- ▶ Internal Systems

WEB DEVELOPER - JOSHUAJONESDESIGN - ORANGE COUNTY, CA 2007 - PRESENT

I design and develop websites for both small and large companies, working to write clean, semantic code for all projects I work on.

- ▶ Dekra-Lite - <http://dekra-lite.com>
- ▶ JacquelynRachel - <http://jacquelynrachel.com>
- ▶ HiDefServers - <http://hidefservers.com>
- ▶ Chelsea Langer Productions, MCHI Press, and many others

EDUCATION

Orange Coast Community College — Web Development & Tech Certifications

TO - DO

I'd like to explore more programming languages, such as a deeper knowledge of PHP and Ruby on Rails. This way, I can help programmers, and also have a better understanding of how to write my markup/css to suit their needs better.

SKILLS

I have an intense passion for semantically written code, that meets web standards. I prefer to hand-write all of my code using the application Coda. I am proficient with XHTML, HTML5, and CSS. (CSS2.1 and CSS3) I know some javascript, but am working to broaden my knowledge in that area. I have experience with many of the popular software suites, such as the Adobe Creative Suite & Microsoft Office. I have extensive knowledge of Mac OS X, and a lot of experience with Windows and Linux (centOS 5 for web servers) operating systems.

I am a geek and love tea.
